## AZURE MIGRATION

Your vision. Your results. Your cloud.

# Why choose the cloud?

YourDMS Cloud Document Management systems provide all of the benefits of a managed application without the overhead of onsite server installations and support.

Our approach is to make things simple, so you can just go online and start using the system.

## WHY USE CLOUD-BASED DOCUMENT MANAGEMENT?

- Immediate access to documents and data from your browser and on your mobile devices, at anytime.
- Store, retrieve and backup your files anywhere in the world.
- Share information quickly and easily.
- Migrate existing data sets with ease, via secure upload mechanisms.
- Scalable solution that allows unlimited users.
- Collaborate with colleagues.
- Free updates mean that you are always using the latest technology.
- Integrate with almost any application, no matter where it is hosted or what technologies it is built upon. From legacy systems to the latest Azure and Amazon cloud-based apps, our document management solutions are built to exchange information across the enterprise.
- Secure. The data remains locked away on ultra secure storage systems that are only accessible to your staff and designated users.
- Full peace of mind knowing your cloud solution is backed by Microsoft Azure.

# Why choose YourDMS?

Some of the best reasons to consider migrating a workload to the cloud with YourDMS include:

## INITIAL SETUP

- Identify business and IT requirements, priorities and constraints
- Initial server & network setup
- High performance security including firewall, and antivirus
- User device setup
- Invu migration
- Updated to latest release

## MAINTENANCE

- Continuous patching and security updates, with upgrade management
- Always using the latest release
- SQL Server Management
- Invu Series 6 ongoing maintenance, metadata and content re-indexes

## DISASTER RECOVERY

- Daily backup to geographically redundant cloud storage locations using snapshots
- Backup storage for 30 days

## COMPLETE SUPPORT

- 24x7x365 monitoring, reporting of all critical services including server availability, SQL availability, application availability, storage usage and backup jobs
- Support for virtual servers, storage, VPN connectivity and backup
- Trusted Microsoft Partner

# Derby Healthcare plc

Derby Healthcare PLC is a special purpose company that entered into a 40-year project agreement to design and build a new acute general hospital and provide facility management services during the 40 year term.

## ANALYSIS

Derby Healthcare plc (DHC) had been using an Invu Document Management system since 2009. They were very happy with how it worked, in particular, how it kept their documents and data secure - a key requirement for them. Their Invu system was installed on a server in their office. As the company grew, it became clear that having an independent server onsite no longer suited DHC's architecture for the network.

Craig Fullwood, General Manager explains, "We wanted something less fallible, something remote that could be hosted away from our systems. In the event of a problem, we would not be tied to a particular piece of hardware, our data needed to be housed off site where it would be safe."

With this in mind, DHC asked YourDMS to explore the options of hosting their Invu system and storing their data in a Cloud environment.

## YourDMS SOLUTION

YourDMS proposed migrating their Invu Document Management system to a Microsoft Azure Cloud environment. This would not only offer them greatly improved performance speeds, but also had the additional benefits of being a secure and scalable solution, that could be managed by YourDMS, leaving DHC to focus on what it does best 'making hospitals work'.

As Craig often worked from different locations as part of his role as General Manager, a Cloud based system needed to provide immediate access to documents and data from desktop computers and mobile devices.

Disaster recovery options were another consideration. DHC wanted to ensure that in the event of a problem, their data would be safely stored off site and easily accessible.

## RESULT

The migration of the Invu Document Management system to the Cloud environment went very smoothly. Susan Thorn, Project Administrator, who was responsible for overseeing the migration project, was on leave at the time of the migration and returned to find that all the work had been completed with no problems. YourDMS's technical support team needed just 10 minutes of each user's time to complete the set up, reducing downtime to an absolute minimum.

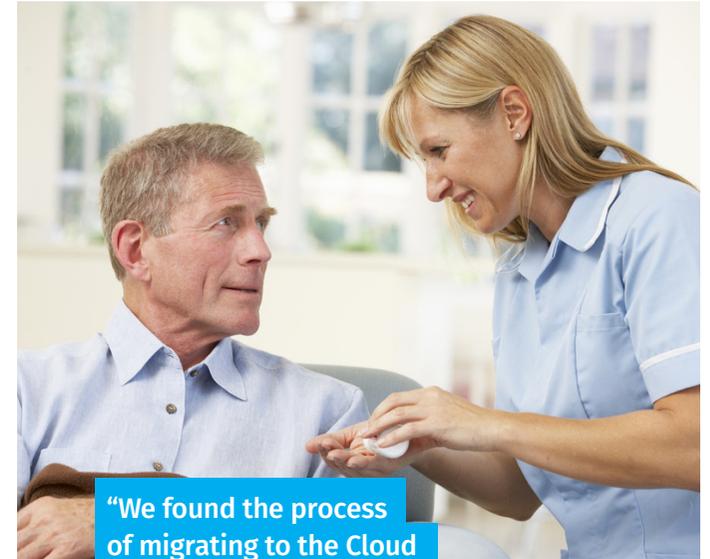

DHC are now experiencing an increase in performance. With no need to route connectivity through their existing network, Craig can take advantage of faster processing speeds wherever he is working.

## Secure & Accessible

One of DHC's key concerns is making sure their data is safe and secure, and that in the event of a disaster or power failure they can access it quickly and continue working. They now have complete peace of mind knowing their data remains locked away on ultra secure storage systems that are only accessible to their designated users. The Microsoft Azure data centres are mirrored in multiple locations, so in the case of a data centre going offline or being unavailable, DHC will be instantly switched to a mirrored data centre with no interruption to their work.

## Would Craig recommend moving to the Cloud?

"I think it makes sense. Otherwise you're reliant on your own backup systems and hardware. Our job is making hospitals work, it's not IT, so we would rather leave that with somebody who knows what they are doing. YourDMS does all the clever stuff."

**"We found the process of migrating to the Cloud pretty seamless and straightforward. YourDMS' technical support team were really helpful in getting us up and running, and it was all done remotely. It only took 10 minutes of each users time, which was really good!"**

**Craig Fullwood**  
General Manager

# Working with YourDMS

At YourDMS we want to understand you, your businesses, your department – in fact, the more we know about you the better. We adopt a partnership approach that combines our technical knowledge and expertise with your knowledge of your business.

**Boost agility and performance in your organisation by migrating to the cloud.**

We use over 20 years of experience to help you balance the needs of your business now, with those in the future.

We consistently deliver high-quality solutions in simple jargon-free terms. We understand not only how the product works, but how it should work for your business.

Our dedicated support team serves hundreds of companies in the UK and Europe. We work with a range of software solutions to fully support businesses to remove their administrative headaches and deliver business efficiencies.

Our business ethics are clear – we only provide solutions that save time, money and improvement with a level of service you may not have experienced before.

## Understanding your needs

We only provide solutions that are right for your business.

## Saving your business time

Streamlining your processes and tasks allowing employee time to be spent where needed.

## Making sure you save money

Providing solutions to enable you to re-invest and grow your business.

## Jargon free

Simple, clear, transparent – you know exactly what to expect.

## Supporting your business

Outstanding customer support packages that help you every step of the way.

## Let's talk...

If you would like to know more about how migrating to the cloud can accelerate your digital transformation, please contact us on 01285 810606 or email [info@yourdms.net](mailto:info@yourdms.net).
