A NEW WAY OF WORKING

With over 20 years of experience in the Data & Document Management industry, we pride ourselves on our knowledge and in particular our ability to translate and deliver this type of technology, simplifying the way organisations work.

Improving efficiency saves time and money, and enhances company engagement with customers and suppliers.

Our dedicated support team serves hundreds of companies in the UK and Europe with their Data & Document Management needs. We work with a range of software solutions to fully support businesses to improve data capture, work flows, print reduction and email management.

Understanding your needs is our priority, whether you are a financial services company, higher education organisation, housing association or retail business, amongst many others.

Of equal importance is ensuring we consistently deliver high quality solutions in simple jargon-free terms. We understand not only how the product works, but how it should work for your business.

Our business ethics are clear – we only provide solutions that save time, money and improvement with a level of service you may not have experienced before.

WE PRIDE OURSELVES IN:

Understanding your needs

Tailored solutions to fit your business.

Saving your business time

Streamlining your processes and tasks allowing employee time to be spent where needed

Making sure you save you money

Providing solutions to enable you to re-invest and grow your business.

Delivering high quality

Just read our customer testimonials for more information.

Jargon free

Simple, clear, transparent – you know exactly what to expect.

Supporting your business

Outstanding customer support packages that help you every step of the way.

Our strong partnerships with industry innovators

INVU: **ABBYY**  **CumulusPro**

 **Microsoft**  **DRAYCIR**  **FUJITSU**  **SISENSE**

“YourDMS complete approach to data & document management offers its existing and future customers real peace of mind. Our knowledge and desire to deliver solutions that work and offer real benefit to its customers is the bedrock upon which the company was founded.”

Stewart Wright
Managing Director
YourDMS Limited

“Invu has made my life so much easier, it’s unbelievable. And I would strongly recommend anybody in a similar position to ourselves, running a high document volume business, to look at the potential of the Invu solution, as provided and supported by YourDMS.”

Peter Curt
Tax Manager
Freedman Frankl & Taylor

DOCUMENT MANAGEMENT

A properly implemented Electronic Document Management solution will have a huge beneficial effect on your business. This can be multiplied when you integrate Document Management to your line of business or back office systems.

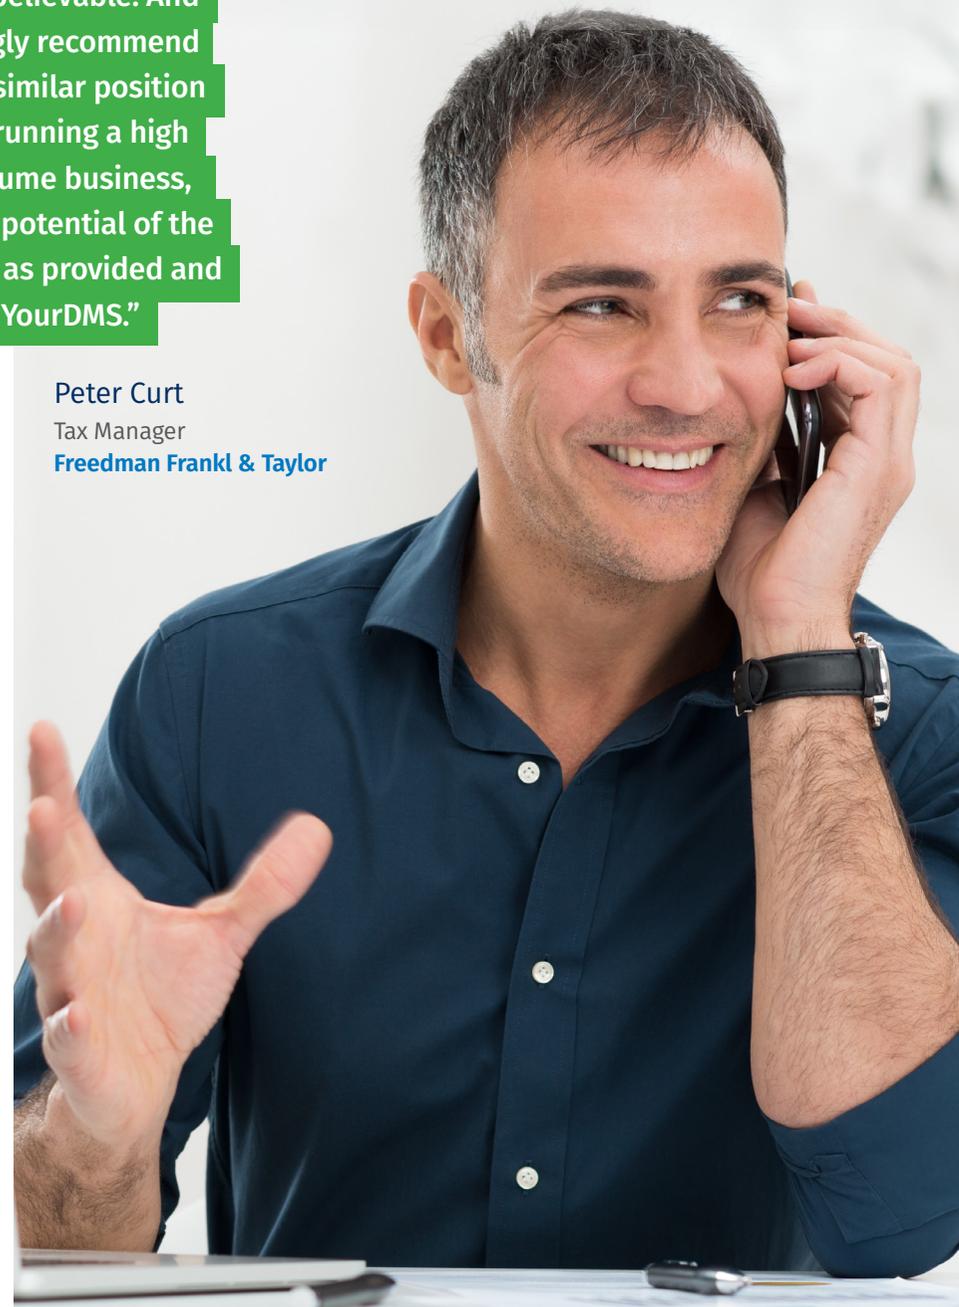

Document Management puts all the information you need within your grasp. The efficient business knows that data access is the key to success.

When your most important client calls, you’ll have the information you need for the conversations that really count. Last month’s sales report, your latest invoice, a customer letter. Document Management cuts the time you lose every day looking for information. The time you save puts you in control of your working day.

A properly implemented Electronic Document Management solution will have a huge beneficial effect on your business.

Working with YourDMS we can:

- Reduce costly business administration
- Simplify and manage compliance within your business
- Remove document loss
- Increase essential information access
- Reduce print costs
- Increase productivity by minimising administration overheads
- Reduce internal data costs
- Remove inconsistent and inaccurate filing procedures
- Reduce slow response times
- Increase customer satisfaction
- Reduce data entry times
- Improve staff morale

DOCUMENT MANAGEMENT IN THE CLOUD

YourDMS Cloud Document Management systems provide all of the benefits of a managed application without the overhead of onsite server installations and support.

Our approach is to make things simple, so you can just go online and start using the system.

Why use cloud-based Document Management?

- Immediate access to documents and data from your browser and on your mobile devices, at anytime.
- Store, retrieve and backup your files anywhere in the world.
- Share information quickly and easily.
- Migrate existing data sets with ease, via secure upload mechanisms.
- Scalable solution that allows unlimited users.
- Collaborate with colleagues.
- Free updates mean that you are always using the latest technology.
- Integrate with almost any application, no matter where it is hosted or what technologies it is built upon. From legacy systems to the latest Azure and Amazon cloud-based apps, our document management solutions are built to exchange information across the enterprise.
- Secure. The data remains locked away on ultra secure storage systems that are only accessible to your staff and designated users.
- Full peace of mind knowing your cloud solution is backed by Microsoft Azure.

“We found the process of migrating to the Cloud pretty seamless and straightforward. YourDMS’ technical support team were really helpful in getting us up and running, and it was all done remotely. It only took 10 minutes of each users time, which was really good!”

Craig Fullwood
General Manager
Derby Healthcare PLC

WORKFLOW SOLUTIONS

Electronic Business Workflow is one of the most powerful tools in use in today's businesses.

Every business uses information on a day to day basis. Any information that needs to be seen, agreed, approved or even just remembered will be greatly improved by the introduction of electronic workflow.

With a well-designed electronic document management and workflow system in place, an organisation should be able to reap a whole range of instant benefits, including:

Over the years, the impact the solutions have had on the business is immeasurable. With the excellent support of YourDMS, we were able to create quite complex layouts and custom scripts which have made a massive impact on our efficiency and the processing and recording of many important documents.

Tony Newton
Senior Systems Analyst
Neville Registrars

[View the case study here](#)

Tighter Timescales

Because the work goes to the right users at the right time, you can cut out huge time delays, and plan for much faster processing times.

Flexible Working

Administrative staff can log onto a network remotely from remote offices or home and still be part of the workflow system.

Efficiency

Improving efficiencies and reducing or removing error, your business will grow without increasing costs.

Guaranteed Delivery

Business rules built into the workflow system ensure all procedures are followed every time, and that documents reach the right people on time. Thresholds and alerts will call attention to any deviation from the rules automatically.

Flexibility

With the workflow model defined in the software, it is possible to alter processes easily, and often without having to re-train staff, making continuous process improvement more straightforward.

DATA CAPTURE

What if you could capture information as it enters the business, extract the data and intelligently populate your back office applications automatically?

Automated Data Capture instantly transforms documents and forms into usable, accessible data ready for export into your own business applications. Paper or Electronic documents it matters not as the data is automatically read, extracted, verified and based upon set rules processed into whichever systems you use.

Automated Data Capture is an evolution in powerful data and document capture. Providing virtually unlimited productivity and power, it frees your business from the most challenging of document processing tasks.

Precise recognition technologies ensure high quality data output. Intuitive verification interface allows operators to manually check the validity of recognised data and to track recognition errors, to manage exceptions should they occur.

Flexible processing workflow means you can accomplish document processing tasks of any complexity. Suitable for fixed forms, semi-structured documents and unstructured documents - Automated Data Capture is one of the most comprehensive and versatile document processing solutions available today.

[View the case study here](#)

“YourDMS’s document management solutions have enabled us to radically improve efficiency and reduce costs. the team has really put its extensive experience to use by delivering solutions that are completely tailored around our very specific business requirements.”

Steve Parkins
Credit Manager
Antalis UK & Ireland

EMAIL MANAGEMENT

Increasingly, business information is stored in emailed memos and attachments rather than on paper or shared filing systems. Things can, however get even more complex...

The modern world has thrown up a raft of new issues for businesses to deal with, particularly the increasing legal and regulatory compliance requirements. With Electronic Document Management and Email Management these complications can be solved with minimum effort.

Secure

The Invu EDM system can restore and protect corporate memory because resources are held centrally and filed in a logical way. Important information is available to all people within the company (within varying levels of pre-set permissions) so corporate information is freely shared, creating a huge time and cost saving for staff at all levels.

Time and Accessibility

Retrieval times are almost instantaneous and 'long lost emails' are now fully accessible, thanks to intelligent keyword searching. Robust computer back up systems ensure that all information can be copied and secured off-site, thus ensuring that fire, flood, theft, and any acts of God will never jeopardise your business.

Space and Money

Exchange issues disappear and office information becomes more accessible. Network storage space will reduce over time with the need to keep local copies of documents being removed as they are now centrally available. Staff working within the business are able to focus on the business, rather than storing documents. In many cases this enables expansion without increasing administration costs. The day-to-day costs in all forms of storage are dramatically reduced.

“This is a really simple, and efficient way to manage the complete Purchase Order process, with control and visibility at every stage.”

Stewart Wright

Managing Director
YourDMS Limited

📺 [Web demonstration available. Contact us for details.](#)

PURCHASE TO PAY

The YourDMS Purchase Order Processing solution delivers an efficient, automated end-to-end solution that streamlines purchasing transactions.

Processing purchase invoices is a time consuming and costly business. By automatically verifying invoices against your purchase orders, payment issues can be highlighted within seconds, giving you the heads up on supplier queries and being able to redirect them to the department or individual required to deal with them. Your business can save valuable time and money, reducing costs and increasing productivity!

The solution includes a Automated Data Capture solution which offers intelligent accurate data extraction from a full range of documents, for example, printed forms, banking documents, invoices or contracts. Precise recognition technologies ensure high quality data output to multiple systems.

[🔗 View solution overview here](#)

[🔗 View brochure here](#)

How does it work?

Users can requisition items (it's just like shopping online). Budget holders are then notified of items that require their approval, and can approve or reject requests quickly and easily.

Approved items are raised in an order, which can be emailed to the supplier by the system or handled manually (phone, post, fax or online). Once an order is raised, users may receipt items on an order which will aid the 3-way matching process once an Invoice arrives.

The invoice is captured, imported into the accounts system, and undergoes a 3 way matching process. Only once the invoice is fully accounted for and authorised is it released for posting. All orders and Invoices are stored in the Invo Document Management system with full metadata to aid searching and linking.

With all order, receipting and invoicing data at your fingertips, combined with a full audit trail of activity, you have a clear picture of your company's finances.

ACCOUNTS PAYABLE

With YourDMS, the ability to automate the data entry of your incoming invoices into your accounts application is a reality!

The YourDMS Invoice Capture & Processing solution is a streamlined system that will save your business time and money, and greatly improve accuracy and efficiency.

The YourDMS Invoice Capture & Processing solution integrates with existing in-house Finance/ERP systems. Data is captured from paper and electronic (pdf) invoices, recognised, interpreted and processed with little or no intervention. A process that can take multiple steps from receipt of an invoice to approval and payment, can now be completed in seconds. Faster processing of invoices allows businesses to take advantage of early payment discounts for significant cost savings.

YourDMS Invoice Capture & Processing will:

- Reduce costly business administration
- Simplify and manage compliance within your business
- Remove document loss
- Reduce print costs
- Reduce data entry times
- Reduce internal data costs
- Remove inconsistent and inaccurate filing procedures
- Increase productivity by reducing administration overheads
- Increase essential information access
- Improve response times
- Increase customer satisfaction
- Improve staff morale

“The changes that YourDMS have implemented for us have made a huge difference to the way we work! The improvements to our invoice approval processes, and the use of intelligent workflows, has allowed us to pay invoices much more promptly, improving productivity and saving money across the business.”

Pobl Group

OUTSOURCED INVOICE PROCESSING

Outsourced Invoice Processing is a fully managed service that automates key tasks within the invoice handling process - an ideal choice for strategic Accounts Payable management.

Our outsourced service is like an extension of your accounts team because we understand your complete process, from start to finish. We use the latest technology and processes to capture the data from your supplier invoices, check and match it against purchase orders, delivery notes and other relevant documentation, and action the business rules exactly the same as your accounts department, before rejecting or approving for payment.

Invoices with anomalies are presented back to the business to action. Approved invoices will be waiting in your accounts software, ready for payment, and filed for review later on. You still have control over all payments to your suppliers, and making them more promptly will improve your supplier relationships and can often qualify for a prompt payment discount.

Replace a fixed, overhead cost with a Pay Per Invoice cost

Our outsourced service is flexible and scalable, quickly adapting to fluctuations in your invoice volumes so you only pay for what you need, when you need. As you grow and your invoice volumes increase, you don't need to increase the size of your team, saving thousands of pounds per year, that you can reinvest in the business. When your team aren't bogged down with tedious, manual tasks, they can focus their time and attention on work that will benefit the bottom line.

Benefits:

- Flexible costs - Pay Per Invoice
- Focus your resources on core business processes
- Improve efficiency and reduce costs
- Provides a clear up-to-date picture of your financial obligations
- Improved cash management
- Enhance innovation by integrating the latest technology
- Drive business growth by utilising your Outsourcing partner's experience and expert knowledge
- Meet new governance, risk and compliance with ease
- Flexible and scalable services that adjust to changes within your business
- Improve response times
- Increase customer satisfaction

EXPENSE CLAIMS PROCESSING

With the YourDMS Expense solution & mobile app, use your phone to capture receipts instantly, wherever you are. The whole process is as simple as **Submit. Approve. Pay.**

One of the biggest headaches for business and employees is the management of director and employee expenses. No-one likes filling out an expense form and sorting receipts at the end of the month. Especially as a lost receipt can result in non-payment of an expense. For a business, it is equally problematic, as they have no idea how much employees are spending until month end.

- Removes the need to keep receipts until the end of the month
- Gives businesses a much better understanding of external cash flow
- Reduces, if not removes, animosity between claimant and accounts team

The YourDMS Expense solution automates and streamlines the complete process allowing employees to build and submit claims quickly and easily, on-the-go. On a train, at the airport, in a restaurant or hotel – anywhere.

Removing paper and manual data entry allows finance teams and managers to review, approve and pay claims online, in as little as 30 minutes, all while adhering to strict company policies and HMRC regulations.

Scan the QR code to download the app.

The YourDMS Expense App can be downloaded from Google Play or the App Store on to any iPhone or Android smartphone.

How does it work?

1. Using the app, employees simply take a photo of their receipts. The smart image settings within the app will ensure that they capture the best possible image of their receipt.
2. Employees can then add additional information such as the date, amount, currency and expense type. Employees log into their account to review their claims at their convenience, and submit them for approval and payment.
3. The finance team review each claim. With no manual data entry required, this is a quick and easy process. Expense claims are sent as a link to the relevant manager for approval. Managers

can approve online, wherever they are, in the 10 minutes before they go into a meeting or on the train travelling, reducing delays.

4. Expense issues can be dealt with separately without holding up the rest of the claim. At any time, claimants can see what stage their claim is at.
5. Once approved, employees are notified and reimbursed correctly and promptly.

Benefits:

- Convenient. Fast.
- Stress free for finance teams
- Automated processes
- Cost effective
- Integration
- Improved visibility
- Fraud prevention
- Audit trail
- Compliance with company policies
- Secure

MAIL ROOM MANAGER

With thousands of items of post per day and an average of 10 pages per item – the sorting and distribution of post is a lengthy, time-consuming task. The YourDMS Mail Room Manager automates the identification, categorisation and distribution of documents, streamlining the process and reducing the amount of time and effort required.

Incoming documents are imported either by scanning or drag'n'drop from email and/or portals. Once imported, a rules based recognition process enables the identification of the document itself and the data/information it

contains. The identification process also uses a set of rules (who am I?, what am I?, who do I go to?) that compile the required data to allow the document to be captured, filed and delivered to the correct department/individual.

Once a document is identified, multiple automated exports can be made to Document Management systems, Network folders, Email systems, Portals, ERP, CRM and Finance systems. When the documents have been exported, a Workflow Process is initiated to enable the distribution of documents to the correct Department(s), Teams or Individuals.

“In today’s digital world, the traditional mail room has evolved to include sorting digital documents, email, online data and reports. The way we process our ‘mail’ needs to evolve with it.”

Stewart Wright
Managing Director
YourDMS Limited

[View solution overview here](#)

OUTPUT CAPTURE

Did you realise that it costs your business around 93p every time you send out a letter? Think about it – the cost of the paper, ink, envelope, stamp, employee time...

You could save hundreds of pounds and improve speed and efficiency simply by sending your documents by email.

YourDMS Output Capture allows you to automate the sending out of business documents. The dynamic and flexible software allow users to instantly and easily merge information from business applications and automatically send out documents such as invoices, statements or letters from any system to multiple email addresses, as PDF files.

The solution writes an email for you using a template you've designed and personalised for sender and recipient, complete with your company branding and messages. It supports HTML and plain text email, allowing you to send out emails that look exactly as you want them to.

Your documents are stored electronically saving manual filing time and filing errors. This allows several people to find and access documents simultaneously. And back ups can be created automatically and copied to secure location.

It works with all major accounting systems including Sage, Pegasus, Opera, Sun Accounts, SAP B1, NAV and many more. And it works with any applications that print, such as Microsoft Office.

Choosing to send documents via email is the cheapest and fastest way to deliver them and with the YourDMS Output Capture it's really simple.

IT SUPPORT SERVICES

Our IT support services and highly efficient Service Desk allow you to focus on your business safe in the knowledge that your IT Network and Systems are taken care of and running optimally.

IT Infrastructure & Telephony Review

Our free auditing service will review your existing network infrastructure and telephony systems. Based on the audit results we will provide you with impartial recommendations on how you can improve your current infrastructure. We can then work with you to put those recommendations in place and maximises efficiency and improve your overall operations.

IT Infrastructure-as-a-Service

Our cloud services deliver traditional server infrastructure into a Dedicated Cloud service, providing unlimited computing capacity on-demand and without the need for costly hardware, installation and maintenance. All IT infrastructure is remotely monitored and managed by YourDMS to ensure peace of mind.

Communications-as-a-Service

Our unified communication as a service solution manages all of your corporate communications – including voice, video, audio, and any combination thereof – over the Internet. Enable your employees to communicate easily and continuously—across all devices and lines of business. With no on-premise equipment to maintain, you avoid costly technology investments. Unparalleled security, peace of mind, and help whenever you need it.

Security-as-a-Service

Our fully managed Security-as-a-Service solution will help to protect your information and communication technologies systems, minimise data theft and safeguard your business-critical data and users from internal and external threats.

Business Continuity-as-a-Service / Disaster Recovery-as-a-Service

Our fully managed backup-as-a-service solution is affordable and efficient cloud-based disaster recovery suitable for any sized business. The YourDMS support team will be there to help you recover as quickly as possible to ensure no loss of revenue. We will always be here when you need us the most.

Microsoft Office 365-as-a-Service

Our managed service offering helps simplify application management. We ensure it continues to operate efficiently, smoothly and securely by maintaining, monitoring and updating your Microsoft Office 365 applications. Delivering efficiency and cost-savings your business needs to remain competitive.

Project Management-as-a-Service

YourDMS can help you with every aspect of your project from initiation & planning to execution & monitoring. We can also manage projects where 3rd party stakeholders have been engaged. Our PMaaS solution is designed to support and drive the complex, sophisticated needs of today's enterprises.

NEXT GENERATION BUSINESS INTELLIGENCE

A Sisense Business Intelligence solution allows you to easily prepare, analyse and explore growing data from multiple sources.

It simplifies every step of the analytics process taking complex data and instantly creating insights that drive your business.

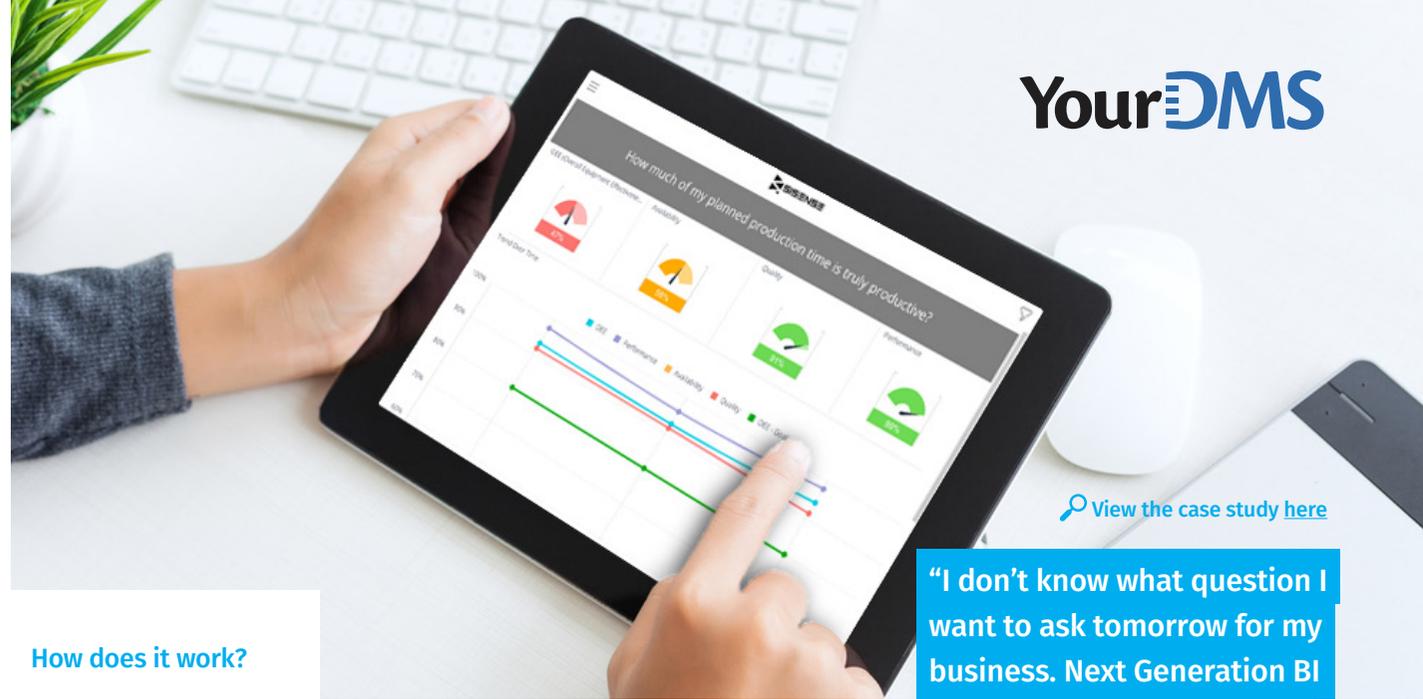

Users can view and explore their data via an interactive dashboard, create reports in minutes and share with colleagues.

If you want to report on something new? *Click and it's done.*

You have the flexibility to create reports that show you the information you need, when you need it.

Responsive dashboards make it easy to view your data and insights across all devices.

From healthcare and finance to marketing, retail, and more, we deliver next generation Business Intelligence solutions for every industry.

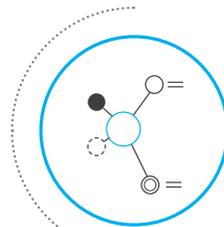

[View the case study here](#)

“I don’t know what question I want to ask tomorrow for my business. Next Generation BI gives me the flexibility and speed in order to act.”

Iain Dougal
Financial Director **Pets Corner**

How does it work?

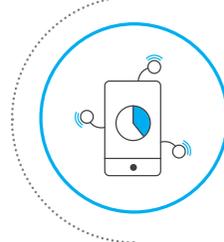

1 COMBINE

Easily clean and combine all your messy data coming from many different sources.

2 ANALYSE

Interactive visual analytics allow you to explore your data and instantly get the answers you need.

3 INSIGHTS

Rethink dashboards and reporting with insights delivered how you want them.

Benefits:

- Faster analytics
- Actionable insights
- Make smarter, faster data-driven decisions
- At a glance views
- Easy to create, export and share reports
- On-premise or in the cloud
- Secure and encrypted
- Flawless data processing and performance
- Scalable
- Integrate seamlessly with existing systems
- Works across all devices
- Mobile app
- Define your own KPIs
- Tailored to your business

The benefits

Once scanned and digitised, your documents will be:

- **ACCESSIBLE**

Scanning makes it simple for your employees to quickly locate, access and share documents instead of wasting time searching for or recreating the ones that go missing.

- **SECURE & COMPLIANT**

A paper-based filing system leaves your documents susceptible/vulnerable/open/liable to being misplaced, lost, stolen, damaged or destroyed. Scanning and digitising your documents gives you an added level of security, ensuring you to meet compliance and record retention regulations.

- **INTEGRATED**

Data can be delivered in any format via our cloud based hosting software for import into your preferred in-house application. We have the knowledge, expertise and care to meet your scanning needs exactly, for your complete peace of mind.

SCANNING SERVICES

YourDMS provide fully managed and professional scanning services. Our understanding of what is important comes from our experience with business process and document management.

We understand that taking the step to have your documents scanned can be a difficult decision, with cost, security and accessibility being major factors in that process.

We also understand that whilst the information may be “archived”, it is still important to your business and needs to be treated with respect.

YourDMS has the knowledge, expertise and care to meet your scanning needs exactly, for complete peace of mind.

PRINT REDUCTION SOLUTIONS

Why should your business look at reducing the amount it prints?

In the UK print volumes are set to increase by over 260% over the next 5 years at a cost in excess of £7bn. This increase in printed information may or may not surprise you, but what may surprise you is that with the correct consultation and solutions, reductions of up to 50% in these volumes is not just possible but absolute.

With demands from Government, the environment and your business, is it not your duty to consider your options?

Reducing cost is one of the most important areas within any business especially in a difficult climate. Sometimes it is hard to see where and when to cut costs! At YourDMS we have techniques and solutions that can help. We focus on reducing dramatically the cost of administering your business with simple, cost effective and established methods.

Our Print Reduction solutions are simple and effective, they can monitor, capture and automatically distribute documents, internally and externally. They have the ability to reduce outgoing print and postage costs. Documents can be delivered quickly and efficiently to customers, suppliers and colleagues as easily as printing the document.

Our advisors are able to look at the amount of documents, information and print you and your employees use. They will then look at where and how to use our solutions in conjunction with your existing infrastructure to reduce cost.

SYSTEMS INTEGRATION

Integration can come in many forms from simple document capture to full data base integration. At YourDMS we have a number of key technologies that suit all businesses and budgets. Integration with Microsoft Office is essential and comes standard with our document management solutions, however as we are all aware, Microsoft applications are not the only ones in use within the office.

One of the main benefits of integration to your central document management system is its ability to give your various applications access to the documents contained within the repository. This means, security permitting, relevant company data can be shared with other departments and their systems. An example could be a contract which is accessible to both the Sales Team's CRM and the Finance Team's Accounts application. Our trained professional services team are able to provide help and assistance with the myriad of integration options available.

[View the case study here](#)

“The support we receive from the team at YourDMS is excellent. Nine times out of ten, they connect to our computers and solve the problem immediately. When they can’t, we never have to wait very long to get things sorted out.”

Tony Newton
Senior Systems Analyst
Neville Registrars

YourDMS SUPPORT

Part of our commitment to you is through the high quality, ongoing service you will receive from us. Our customers tell us that it’s one of the reasons they chose us.

With a dedicated and trained technical support team in-house, you are always guaranteed expert help and advice no matter who you talk to on our helpdesk. With the ability to access your system remotely, issues can be resolved immediately and with minimal disruption to you. For most clients, our online support resolves the majority of issues without the need of a call or a visit. However, if there’s a need for a site visit, our friendly and experienced staff will be on hand for a face-to-face meeting.

With a range of support packages, at competitive rates, you will also receive free product upgrades and free installation of version updates (crucial in ensuring that you are using the latest technology to keep your business competitive), web seminars showing “best practice and enhancements” and a host of other benefits.

[View solution overview here](#)

CONSULTANCY

A consultant (from Latin: *consultare* “to discuss”) is a person who provides professional or expert advice.

So why do so many consulting firms just tell you what they know, rather than talk to you about what you know?

At YourDMS we want to understand you, your businesses, your department - in fact the more we know about you the better. Our approach to consultancy is one of merging our knowledge and expertise with yours. Using our experience, we will help you balance the needs of your business now, with those in the future.

Our customers value our approach, so why not contact YourDMS to see if we can help you with your Document Management Consultancy needs.

YOU'RE IN GOOD COMPANY...

Just some of the organisations that we've had the pleasure of working with. Industries include Retail, Manufacturing, Education, Finance, Construction, Housing Associations, Food & Drink, Engineering, Legal and Charity.

WHAT OUR CUSTOMERS ARE SAYING...

We can tell you how great our solutions are, how they will save you valuable time and money, how we will help you every step of the way and provide outstanding after sales support – but it means more when our customers are happy to say it too.

“YourDMS took the time to understand what was different about our company’s needs, and worked with us to provide a solution which enables us to process invoices quickly and correctly. They have worked with us ever since, providing support and making improvements to the system to cope with the changing needs of our business.”

Financial Manager
Healthcare RM

“I have to say we are impressed by how fast the office got on to the issues after your visit, I doubt you had got far down the road when we got the call! Thanks a lot, that’s great after care.”

Lindsay O’Conner
Administration Manager
CH Jefferson & Co

“As always your staff are so helpful and always manage to resolve issues we have. I cannot fault the service we receive from YourDMS - cannot recommend you highly enough.”

Sarah Studdert-Kennedy
Director
SKD Education & Guardianship Ltd

“The YourDMS support team have been absolutely amazing to be honest! I’ve never had a problem getting the help I need from them. They’ve been very quick at responding, so I’d actually say out of the various help desk people I deal with, they’re one of the joyous teams to deal with.”

Perry Willis
Head of IT
Modiano

“The Support Team’s advice on how to get the best from Invu was extremely clear, helpful and much appreciated. If I need help in the future I’ll know who to call!”

Maria Hawkins
Sales Admin
Vale Motors

“I could not be happier with the relationship I have with you guys and the tremendous support you give.”

Ernie Faulkner
Software Consultant
